

HIMANSHU AASHISH

FULL-STACK & GENERATIVE AI DEVELOPER

Bhubaneswar, Odisha, India • +91-8480090069 • himanshuaashish4@gmail.com
linkedin.com/in/himanshu-aashish-0a5554243 • github.com/himanshxsr

PROFESSIONAL SUMMARY

Result-driven **Full-Stack Developer** with hands-on experience building scalable web applications, enterprise automation tools, and real-time multiplayer backend engines. Proficient across the **MERN Stack**, **Next.js**, **PHP**, and **AWS**. Skilled in **Generative AI (GenAI) integration**, specializing in orchestration with LangChain, local LLMs via Ollama, and agentic workflows to deploy autonomous, business-intelligent microservices. Proven ability to own software delivery lifecycles from initial schema design to final production deployments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, PHP, SQL (PostgreSQL, MySQL), HTML5, CSS3
Front-End: React.js, Next.js, Redux Toolkit, Tailwind CSS, 3D Spatial Animations, Responsive UI Design
Back-End & Databases: Node.js, Express.js, MongoDB, Socket.io, RESTful APIs, Database Schema Design
Cloud & DevOps: Amazon Web Services (AWS), GitHub Actions (CI/CD Pipelines), Git Version Control, Docker
Generative AI (GenAI): LLM Integration (Ollama, OpenAI, Claude), LangChain, AI Agents, Prompt Engineering, Cursor IDE

PROFESSIONAL EXPERIENCE

Elisium Space Pvt. Ltd. April 2025 – Present
Software Development Engineer (SDE) Remote

- **Architected and launched an enterprise-grade HRMS Attendance Portal** (April 2026 live deployment) to automate internal workforce tracking, workforce shift logic, and data telemetry.
- **Designed optimized database schemas** and high-throughput REST APIs using Node.js and MongoDB, decreasing application query latency and enhancing system scalability.
- **Developed responsive frontend dashboards** using Next.js and Tailwind CSS, increasing operational client-side execution efficiency and layout responsiveness.
- **Integrated Generative AI toolings** into regular development workflows to optimize code quality, handle structured refactoring patterns, and significantly accelerate feature release cycles.
- Collaborated closely with corporate leadership and cross-functional teams to engineer, configure, and securely deploy multi-tier application microservices natively on **AWS** infrastructure.

TECHNICAL PROJECTS

COBRA - Strategy Based Card Game [LINK] AWS, Node.js, Socket.io
Lead Backend & Systems Architect Core Engine Project

- Engineered full backend ecosystem and real-time session tracking rules for a complex, 6-deck multiplayer strategy card game hosted natively on **AWS** cloud servers.
- Built an event-driven synchronization layer using **Socket.io** to broadcast live match telemetry under strict latency constraints.
- Implemented server-side validation checks to mitigate unauthorized client-side states and protect online gameplay logic.

Real-Time Multi-Room Chess Platform Next.js, Express, MongoDB
Full-Stack Engineer Independent Engineering

- Designed a unified shared database architecture from scratch to handle player match history, active rooms, and real-time profiles.
- Programmed matchmaking algorithms and automated state persistence routines to protect active game state parameters from abrupt disconnects.

Interactive 3D / Spatial Engineering Showcase Next.js, Three.js Mechanics
Frontend UI/UX Lead Personal Portfolio

- Building an immersive personal web application utilizing spatial layout configurations and 3D animations to showcase core projects.

EDUCATION

Rustam Ji Institute of Technology (RJIT), BSF Academy Graduation: 2026
Bachelor of Technology (B.Tech) – Electronics and Communication Engineering Gwalior, MP

Shree Krishna International School Bhubaneswar, Odisha
All India Senior School Certificate Examination (Class XII – Intermediate)
